Español: Native

Inglés: C1 Advanced

ABOUT ME

Full stack developer orientated to Front End and UX/UI design. My time at art school gave me strong foundations in layout and design.

Also, I have an inclination for data science, in which I am currently training.

I'm a very enthusiastic, curious person who enjoys learning and solving problems. I consider myself an autonomous, analytical, creative, perfectionist and responsible person.

Today I continue training, learning new technologies and acquiring new knowledge. My thought is in this profession you never stop learning.
